SKU: 31002

PRODUCT DESCRIPTION

Purpose & Benefits of Able Life Auto Assist Handle

The Able Life Auto Assist Handle is a portable device designed to aid individuals in safely entering and exiting their vehicles. This handle is particularly beneficial for seniors, people recovering from surgery, or anyone with mobility challenges. It acts as a supportive grab bar that attaches securely to the door latch of almost any car, providing extra leverage and stability.

Features

- **Easy Accessibility:** Enhances vehicle accessibility by offering a sturdy grip point, helping to reduce the strain on the legs and back when getting in and out of a car.
- **Non-Slip Grip:** Features a non-slip rubber grip that provides a secure hold to prevent hand slippage during use.
- **Portable and Compact:** Lightweight and compact, this handle can be easily stored in the glove box, door compartment, or purse, making it convenient for travel.
- **No Installation Required:** It does not require any modifications or tools for installation, simply slot it into the door window for instant use.

Specifications

- **Weight Capacity:** 113kg
- **Compatibility:** Fits most vehicle door window sills

The Able Life Auto Assist Handle is an essential tool for enhancing mobility and independence for individuals who find it challenging to enter and exit vehicles. Its robust construction and thoughtful design provide peace of mind, knowing that additional support is readily available whenever it's needed.
