

ARJO 4 POINT DOUBLE AMPUTEE SLING WITH HEAD SUPPORT

\$647.00

SKU: MAA2090M-H

PRODUCT DESCRIPTION

PURPOSE & BENEFITS

Suitable for patients with bilateral leg amputations above the knee or total hip, this sling provides good comfort and support for a range of everyday patient handling routines, such as bed and chair-related transfers.

Designed for use with four-point Dynamic Positioning System (DPS) spreader bars, which provide a more comfortable reclined position in the sling and a more even distribution of the resident's/patient's weight.

The DPS system allows the caregiver to position the resident/patient in the sling from upright to reclined with minimum physical effort.
