

ARJO BARIATRIC SPLIT LEG HAMMOCK LOOP SLING

\$1,901.00

SKU: MAA8020-H

PRODUCT DESCRIPTION

PURPOSE & BENEFITS

Patients can be transferred in a sitting-up position with the Standard slings or in a semi-reclined position with the hammock slings. All slings feature positioning handles on the outside to grant caregivers more precise control during transfers. The soft material features reinforced stitching in trouble areas to ensure durability and longevity, as well as support patient comfort. These slings have a safe working load of up to 1,000 pounds, ensuring they can accommodate any bariatric patient.
