

ARJO MAXI MOVE LIFTER

\$15,994.00 - \$20,366.00

SKU: KMCSUN-D-22-H

PRODUCT DESCRIPTION

PURPOSE & BENEFITS

The Arjo Maxi Move Lifter is specifically engineered to facilitate the efficient and safe transfer and repositioning of patients or residents, even in situations that require significant physical effort. This innovative device empowers a single caregiver to handle the demanding tasks associated with daily patient mobility. To cater to a wide range of transfer requirements, the Arjo Maxi Move Lifter is equipped with a variety of spreader bars, allowing for easy customization and adaptation.

This flexibility ensures that the lift can accommodate the specific needs and conditions of each individual, providing a personalized and comfortable experience during transfers. By offering a comprehensive solution that enhances caregiver efficiency and patient comfort, the Arjo Maxi Move Lifter contributes to an improved standard of care and promotes the well-being of both caregivers and patients.

KEY FEATURES

- **Stable Lifting:** Experience the utmost stability during lifts with the Arjo Maxi Move Lifter's consistent vertical lifting action, keeping the patient securely positioned at a constant distance from the mast.
- **Precision Transfers:** Optimize efficiency and minimize manual handling using the integrated powered dynamic positioning system (PDPS) of the Arjo Maxi Move Lifter, which seamlessly repositions the patient within the sling for precise transfers.
- **Versatility:** Customize the Arjo Maxi Move Lifter to individual needs by selecting from an extensive range of slings, made possible with the optional interchangeable spreader bars designed for adaptability.
- **Wide Lifting Range:** Effortlessly perform transfers onto beds or from the floor with the Arjo Maxi

Move Lifter's dual-action telescopic mast, which can be complemented by an extended jib for an expansive lifting range.

- Flexible System with Numerous Options Available: Enhance functionality and adaptability to different environments with optional features of the Arjo Maxi Move Lifter, such as an available scale for accurate weight measurements and three sizes of castors, including extra-low options for easy access under low couches and trolleys.
