

## ARJO MAXI TWIN FLOOR LIFTER

**SKU:** KTBB4BSX2AU-H

## PRODUCT DESCRIPTION

### PURPOSE & BENEFITS

The twin mast design of the Arjo Maxi Twin Floor Lifter distributes the weight evenly, and the large handholds enable caregivers to manoeuvre the lifter. The open mast design also allows for additional legroom for the patient. The dual mast is designed to enable close, reassuring contact between caregiver and patient throughout the transfer. Integrated with the spreader bar is a powered dynamic positioning system (PDPS) that helps in repositioning the patient in the sling, minimising manual handling. Maxi Twin has been designed to be operated by a single caregiver.

Optional electronic scale enables the caregiver to weigh the patient while performing a transfer.

### FEATURES
