

ARJO RHAPSODY BATH

SKU: AR32311EU1111

PRODUCT DESCRIPTION

Purpose & Benefits of Arjo Rhapsody Bath

The Arjo Rhapsody Bath is designed to provide a comfortable and therapeutic bathing experience for individuals with reduced mobility, especially in healthcare settings. This advanced bath system helps facilitate assisted bathing, making it safer and more accessible for patients, including the elderly and those with physical limitations. It offers both caregivers and patients a dignified solution that enhances hygiene while reducing the physical strain often associated with traditional bathing methods.

Features

- **Therapeutic Benefits:** Equipped with features such as hydromassage and adjustable water temperature controls, the Rhapsody bath can provide therapeutic benefits, helping to relax muscles and improve circulation.
- **Ease of Access:** Designed with a low-entry profile and wide doors, it allows for easy access for patients, reducing the risk of injury during entry and exit.
- **Adjustable Positioning:** Features such as height adjustability and recline options ensure that caregivers can position patients safely and comfortably, adhering to best ergonomic practices.
- **Integrated Lift System:** The optional integrated lift system aids in the safe transfer of patients into and out of the bath, minimising the need for manual lifting and thereby reducing the risk for both patients and caregivers.
- **Durable Construction:** Made with high-quality materials that are easy to clean and maintain, ensuring long-term durability and compliance with hygiene standards.

Specifications

- **Material:** High-quality, medical-grade materials that are resistant to chemicals and easy to

disinfect.

- **Safety Features:** Includes anti-slip surfaces, emergency stop buttons, and built-in handrails to enhance safety.
- **Water Capacity and Dimensions:** Specifically designed to accommodate various body types while optimising water usage.

The Arjo Rhapsody Bath system is an essential component in modern healthcare facilities, providing a safe, comfortable, and efficient way to maintain personal hygiene for patients with mobility challenges. It supports health and wellness by transforming routine hygiene into a soothing and dignified experience.
