SKU: BE9200

PRODUCT DESCRIPTION

PURPOSE & BENEFITS

The **Bellman External Door Microphone** is designed for use with the Bellman Visit Door Transmitter to detect hard-to-reach sound sources such as intercoms. This accessory allows the door transmitter's built-in microphone to detect the doorbell while the external microphone monitors another sound source, providing greater flexibility and coverage for multiple entry points.

FEATURES

- Enables the Bellman Visit Door Transmitter to detect additional sound sources like intercoms
- Compact and easy to position in tight or inaccessible spaces
- Simple plug-and-play connection via 3.5mm mono jack
- Reliable piezoelectric microphone ensures consistent sound detection
- Ideal for expanding door or entryway alert coverage

SPECIFICATIONS

- **Cable Length:** 0.75 m (BE9200)
- **Microphone Type:** Piezoelectric
- **Connector:** 3.5 mm mono jack plug
- **Size:** 33 × 36 × 4 mm (W × H × D)
