PRODUCT DESCRIPTION

Purpose & Benefits of the Configura Bariatric CushionAir Cushion and Pump

The Configura Bariatric CushionAir Cushion and Pump is designed to deliver superior pressure relief and comfort specifically for bariatric users. It provides a customised seating experience by utilising advanced air-cell technology, ensuring even pressure distribution and reducing the risk of pressure injuries. With its high weight capacity and adjustability, this cushion offers enhanced support for individuals in healthcare settings, rehabilitation, or home care environments.

Key Features

- **Designed for Bariatric Users:** Specifically engineered to support users with higher body weight, providing reinforced support and pressure relief up to 250 kg.
- **Pressure Redistribution:** Utilises interconnected air-cell technology that adapts to the user's weight and movements, preventing pressure points and promoting healthy blood circulation.
- **Customisable Inflation:** The included pump allows users to adjust the air pressure, enabling personalised comfort and support based on individual needs and preferences.
- **Durable, Heavy-Duty Construction:** Made with high-quality, durable materials to withstand higher weight capacities, the cushion also features a robust cover that is resistant to wear and easy to clean.
- **Enhanced Hygiene and Maintenance:** Comes with a machine-washable, waterproof cover to maintain hygiene and extend product longevity, making it ideal for use in clinical environments or at home.

Specifications
