THERAMED DONUT RING LATEX SUPPORT CUSHION

SKU: A140713002

PRODUCT DESCRIPTION

CUSHION THERAMED DONUT PURPOSE & BENEFITS

The Cushion Theramed Donut reduces pain to coccyx and tailbone area when seated. Coccyx discomfort, also known as tailbone pain can get even worse when seated, however, if you make use of a donut cushion, you can reduce pain by reducing pressure on those tender areas. With a specifically place opening, the coccyx cushion keeps pressure off of the area so that you have reduced pain while seated. Our donut pillow has a donut shape that optimises support for your bottom while diffusing with the centre opening. The unique foam cushion contours to the shape of your body for better support of your bottom. Likewise, it distributes body weight evenly while preventing stress on lower body and legs.

The latex foam donut ring cushion can relieve some pregnancy & post natal tenderness. New mums can find it hard to sit comfortable. It isn’t easy getting comfortable after pregnancy and childbirth but a latex foam donut ring cushion can make it much easier, especially in the weeks following birth when everything is tender and healing.

FEATURES
