PRODUCT DESCRIPTION

Purpose & Benefits of DermaSaver Stay-Put Heel Protector

The DermaSaver Stay-Put Heel Protector is designed to provide superior protection and comfort for individuals at risk of developing pressure ulcers or experiencing heel pain. This heel protector helps reduce pressure, friction, and shear on the heel, making it an ideal solution for individuals who are bedridden, have limited mobility, or are recovering from surgery.

Features

- **Pressure Relief:** Made with soft, breathable materials that distribute pressure evenly across the heel, reducing the risk of pressure ulcers and promoting healing.
- **Stay-Put Design:** Features a unique design that keeps the protector securely in place without the need for constant adjustments, ensuring consistent protection.
- **Breathable Fabric:** Constructed from moisture-wicking and breathable materials that help keep the skin dry and comfortable, preventing heat and moisture buildup.
- **Adjustable Fit:** Equipped with adjustable straps or closures that allow for a customised fit, ensuring the protector stays in place and provides optimal comfort and support.
- **Lightweight and Comfortable:** Made from lightweight materials that do not add bulk or discomfort, allowing for extended wear without irritation.
- **Machine Washable:** Easy to clean and maintain, the protector can be machine washed and dried, ensuring hygiene and long-term use.
