SKU: DBB-H

PRODUCT DESCRIPTION

PURPOSE & BENEFITS

The Brolly Sheets Dryer Balls - 4 Pack is an eco-friendly and efficient solution for enhancing the drying process of your laundry. These specially designed dryer balls are intended to help reduce drying time, soften fabrics, and minimize static, making them a valuable addition to any laundry routine.

FEATURES

- **Natural Fabric Softening:** The dryer balls work by gently separating fabrics, allowing for better air circulation and naturally softening clothes without the need for chemical fabric softeners.
- **Reduced Drying Time:** By improving air circulation within the dryer, these balls can significantly reduce drying time, saving energy and reducing electricity costs.
- **Eco-Friendly Material:** Made from durable and natural materials, these dryer balls are an environmentally friendly alternative to disposable dryer sheets.
- **Reusable and Long-Lasting:** Designed to be used hundreds of times, offering an economical and sustainable option for laundry care.
- **Minimizes Static and Wrinkling:** Helps to reduce static cling and can minimize wrinkles in clothing, reducing the need for ironing.
- **Suitable for All Fabrics:** Safe to use with a wide range of fabrics, including delicates.

The Brolly Sheets Dryer Balls - 4 Pack is a practical and eco-friendly choice for anyone looking to enhance their laundry routine. These balls not only make your clothes feel softer and dry faster, but they also contribute to a more sustainable household by reducing energy consumption and eliminating the need for disposable softening products.

INSTRUCTIONS FOR USE

Place your wet load of laundry in the dryer with the dryer balls. Four balls will be sufficient for most normal loads. More may be used for very heavy loads if required. You can add a drop of essential oil directly onto the balls to naturally scent your laundry!

Use your normal dryer settings reducing the dry time by 20-30% to start. This will vary by type of dryer, how fast your washing cycle spins, types of fabric, and size of the load in the dryer.
