ETAC FIX PREPARATION BOARD

SKU: 80501004

PRODUCT DESCRIPTION

PURPOSE AND BENEFITS

The Etac Fix preparation board enables individuals with limited hand strength or single-handed functionality to perform tasks like grating, cutting, whisking, and peeling. The board remains stable with its four friction feet or the suction feet provided. Its jaws securely hold bowls, graters, or food items in place. Additionally, there is a detachable small plate with spikes for holding food pieces. If a flat surface is desired, the plate can be repositioned with the spikes facing downward.

FEATURES

- The jaws of the Fix preparation board offer a reliable grip, ensuring stability while holding a bowl, grater, or food in place during various food preparation tasks.
- The Fix preparation board includes a small plate with spikes specifically designed to securely hold smaller pieces of food. This feature enhances stability and facilitates cutting or chopping tasks. If a flat working surface is desired, the plate can be easily removed and positioned with the spikes pointing downward.
- The clamp of the Fix preparation board provides a secure hold on tins or bowls, offering a convenient and stable platform for food preparation tasks.
- The friction feet of the Fix preparation board effectively prevent any unwanted movement and ensure stability by securely anchoring the board in place during use. This feature is particularly useful on different surfaces, as it minimizes any potential sliding or shifting.
- The Etac Fix Food Preparation Board is crafted using robust and durable materials, making it well-suited for everyday use in the kitchen. Its high-quality construction guarantees long-lasting performance and reliability, ensuring that it can withstand the rigours of regular use over an extended period of time.
