PRODUCT DESCRIPTION

PURPOSE AND BENEFITS

The Swift Freestanding is the optimal selection for a raised toilet seat that can be effortlessly set up. It provides a customizable seat height that caters to your individual requirements and robust armrests that simplify the motions of standing and sitting. When augmented with a pan, it can also function in the bedroom as an independent toilet chair. Due to its design, which is resistant to damp environments, the Swift can double as a shower stool.

FEATURES

- **Compatibility with diverse toilets:** Swift can be seamlessly adjusted to the required height and accommodates both wall and floor-mounted toilets. The sturdy armrests render significant support for the user during the process of standing up or sitting down.
- **Impressive stability:** The chair's broad footprint contributes to its exceptional stability. The adaptable, non-slip ferrules on its legs provide an excellent grip on wet or irregular surfaces.
- **Effortless setup:** The assembly process of the chair is straightforward, requiring no tools. The self-locking mechanism snaps into place securely, and the oval-shaped design of the legs avoids any rotation during adjustments.
- **Easy transportation:** Swift is packaged in a flat, compact carry case for hassle-free transit. Given its ease of assembly and disassembly, the case can be retained and utilized for additional transports if the chair is used in various locations.

SPECIFICATIONS

Seat height	42-57 cm
