

## HEMOCRAFT CURVED TRANSFER BOARD

\$174.00

SKU: PAT-AA8835

## PRODUCT DESCRIPTION

### PURPOSE & BENEFITS

The Homecraft Curved Transfer Board is an essential mobility aid designed to assist individuals in moving safely and easily between sitting positions, such as from a wheelchair to a bed, car seat, or chair. This transfer board is ideal for those with limited mobility or those who require assistance in transitioning between different sitting surfaces.

### FEATURES

- **Curved Design:** The unique curved shape of the board facilitates a variety of transfer situations, accommodating different angles and positions.
- **Smooth Surface:** The board's surface is smooth to reduce friction and make transfers easier while ensuring comfort for the user.
- **Durable Construction:** Made from high-strength materials, the board is sturdy and reliable, providing support during transfers.
- **Supports Independent Transfers:** The design of the board promotes self-transfers, enhancing the user's independence and dignity.
- **Non-slip Pads:** Equipped with non-slip pads or surfaces on the underside to prevent the board from moving out of place during use, ensuring safety.
- **Easy to Clean:** The material of the board is easy to wipe down and sanitize, which is essential for maintaining hygiene.

The Homecraft Curved Transfer Board is a practical and invaluable tool for those who face challenges with mobility. Facilitating safer and more comfortable transfers helps reduce the risk of injury and increases the autonomy of users in their daily activities. Whether used at home or in a clinical setting,

this transfer board is an excellent aid for enhancing quality of life and mobility independence.
