PRODUCT DESCRIPTION

PURPOSE & BENEFITS

The typical built-up and lightweight foam handles with utensil holes on both ends are reimagined in these Lightweight Double Ended Handle. One-handed eating is made possible by these practical kitchen and dining tools that let you wield two utensils at once.

The Lightweight Double Ended Handle are designed to enhance your dining experience with their ergonomic and innovative design, making them the perfect utensil for individuals with limited mobility or dexterity.

The Cutlery Handle features a versatile design that allows you to interchange various utensils, providing convenience and flexibility for different dining needs. Its secure grip and lightweight construction make it ideal for individuals seeking a comfortable and effortless dining experience.

FEATURES

- The foam handle provides an easy-to-grip and regulated alternative for people who have trouble grasping small utensils.
- It is also appropriate for toddlers and young children who have trouble grasping conventional utensil handles.

Please note - This is a handle for the cutlery set, please check out the cutlery set below
