SKU: 01C0-H

PRODUCT DESCRIPTION

Purpose & Benefits

An exceptionally warm and luxurious sock, the Humphrey Law Alpaca Health Sock combines the insulating power of wool with the softness of premium alpaca fibre. Designed for comfort, it features the Health Sock® construction with no tight elastic at the top, making it ideal for those with circulation concerns or sensitive skin.

The microscopic air pockets within the alpaca fibre help retain body warmth, ensuring all-day comfort in cooler climates. While perfect for casual or indoor wear, these socks are not recommended for high-abrasion activities such as wearing with work boots, due to the delicate nature of alpaca.

Features

- Premium blend of alpaca and wool for warmth and softness
- Health Sock® design with non-restrictive top – ideal for sensitive feet
- Excellent insulation thanks to alpaca's natural air pocket structure
- Comfortable for extended daily wear in cooler conditions
- Proudly made in Australia
