

ICARE DUAL JOYSTICK CONTROLLER

\$1,655.00

SKU: PT3JSTK

PRODUCT DESCRIPTION

Features and Benefits

The iCare Dual Joystick Controller is a specialised control upgrade designed for users who need simplified, accessible control of iCare adjustable beds. Featuring dual ergonomic joysticks, this modification supports users with limited dexterity, allowing one-handed or assisted operation with minimal strain.

Ideal for home care, rehabilitation, or aged care environments, the controller offers enhanced autonomy by making bed adjustment functions more manageable. It integrates seamlessly into the iCare bed system and is designed for easy installation.

Features

- Dual-joystick interface for intuitive bed adjustment
- Enhances accessibility for users with limited mobility
- Compatible with iCare adjustable bed systems
- Ergonomic, low-force controls
- Ideal for aged care, disability support, and clinical settings
