SKU: IC30

PRODUCT DESCRIPTION

PURPOSE & BENEFITS

The Icare IC30 Medium ActiveX Gel-Infused Mattress is a therapeutic mattress designed to provide exceptional comfort and support for individuals requiring pressure relief and temperature regulation during their rest. It is engineered with advanced materials and technology to address the needs of users with mobility limitations or those who spend extended periods in bed.

FEATURES

- **Gel-Infused Memory Foam:** This is a gel-infused memory foam that conforms to the body, offering excellent pressure redistribution while aiding in reducing heat buildup.
- **ActiveX Material:** The ActiveX component is a highly resilient and elastic material known for its ability to maintain a cooler surface, an essential feature for users prone to temperature sensitivity.
- **Medium Firmness:** The IC30 model offers a medium firmness level, striking a balance between softness for comfort and firmness for support.
- **Multi-Layered Design:** This mattress often features a multi-layered design that combines various foams and materials to deliver both comfort and therapeutic benefits.
- **Pressure Care:** Specifically designed to prevent pressure sores, it's ideal for individuals who are bedridden or have limited mobility.
- **Thermo-Regulating Cover:** The inclusion of a high-quality cover that is breathable and assists in temperature regulation, often stretchable to move with the foam and the user.

The Icare IC30 Medium ActiveX Gel-Infused Mattress represents an optimal blend of therapeutic support and comfort, suitable for both healthcare settings and home use. With its advanced features,

it stands out as a considerate choice for those seeking a better sleep experience while needing additional care for pressure management.
