PRODUCT DESCRIPTION

Purpose & Benefits of the IMAK Elbow Sleeping Brace/Splint

The IMAK Elbow Sleeping Brace/Splint is specifically designed to provide nighttime relief for individuals suffering from elbow pain, including symptoms related to conditions such as cubital tunnel syndrome, tennis elbow, and general elbow discomfort. This splint supports the elbow in a comfortable, extended position to help reduce pressure on the nerve and prevent the elbow from bending while you sleep, which can exacerbate pain and slow recovery. By stabilizing the elbow joint and promoting proper alignment, the IMAK Elbow Sleeping Brace/Splint aids in a restful night's sleep and encourages a faster healing process, making it a valuable aid for anyone looking to manage elbow pain effectively.

Features

- **Comfortable Stabilisation:** Holds the elbow in an optimal position for healing throughout the night, preventing unwanted movements that can cause pain and further injury.
- **Padded Design:** Features soft, cushioned material inside to enhance comfort, minimizing the chances of sleep disruption due to discomfort.
- **Adjustable Straps:** Equipped with adjustable straps that allow for a custom fit and easy adjustment, ensuring the splint stays secure without being too tight.
- **Breathable Material:** Made from breathable fabric that keeps the elbow cool and comfortable, avoiding overheating and perspiration during the night.
- **Easy to Use:** The design is simple, making it easy to put on and take off, even for individuals with limited mobility.
- **Ergonomic Fit:** Ergonomically shaped to contour the elbow naturally, providing support without unnecessary pressure or restriction.

Specifications

- **Material:** Soft, breathable fabric with padding for added comfort
- **Size:** One universal size
- **Care Instructions:** Machine washable, making it easy to keep clean and maintain hygiene
