

INVACARE IV POLE - CS8 BED COMPATIBLE

SKU: CS8-IV110

PRODUCT DESCRIPTION

Purpose and Benefits

The CS8 Bed IV Pole is a purpose-built accessory designed to integrate seamlessly with the Invacare CS8 Floorline Bed. It offers a stable and reliable solution for administering IV fluids without the need for separate mobile stands, helping streamline patient care in home and clinical environments.

Mounted directly to the CS8 bed frame, this IV pole keeps essential equipment within reach while preserving floor space and reducing clutter. It allows for efficient repositioning of the bed without interrupting IV setup and ensures safe, stable support for one or two fluid bags.

Ideal for hospitals, aged care, and home-based care, this attachment enhances mobility and patient monitoring by keeping critical support equipment close to the bedside.

- Compatible with Invacare CS8 Bed
- Keeps IV equipment accessible and secure
- Minimises floor clutter and tripping hazards
- Enhances efficiency for carers and clinical staff
- Ideal for settings requiring flexible repositioning of beds

Features

- Fixed-mount IV pole for Invacare CS8 Bed
