PRODUCT DESCRIPTION

Purpose & Benefits of the KCare Foxy Plastic Sock Aid

The KCare Foxy Plastic Sock Aid is an essential tool designed to assist individuals who have difficulty bending, reaching, or handling socks due to mobility restrictions, arthritis, or after surgery. This simple yet effective device allows users to independently put on socks without the need to bend down, enhancing their ability to dress and maintain independence.

Features

- **Easy-to-Use Design:** The sock aid features a curved, smooth plastic surface that cradles the sock, allowing the user to easily slip their foot into the sock without bending.
- **Slip-Resistant Surface:** The interior is lined with slip-resistant material that helps hold the sock in place during use.
- **Long Handles:** Equipped with long, durable cords that provide additional reach, making it easier for users to guide their foot into the sock without significant bending or stretching.
- **Lightweight Construction:** Made from lightweight plastic, it is easy to handle and maneuver, especially for users with limited strength.
- **Compact and Portable:** Its compact design ensures it can be easily stored and transported, perfect for travel or storage in small spaces.

Specifications

- **Weight:** 50g
- **Colour:** Orange
- **Care Instructions:** Easy to clean with a damp cloth; the material is designed to withstand regular use and cleaning.

The KCare Foxy Plastic Sock Aid is a practical and beneficial tool for anyone facing challenges with mobility or dexterity. It simplifies the process of putting on socks, promoting self-sufficiency and reducing the need for assistance with daily dressing tasks.
