

LIGHT DRIVE RIGID WHEELCHAIR POWER ASSIST | TURN ANY WHEELCHAIR INTO A POWER CHAIR

SKU: 81M21CF

PRODUCT DESCRIPTION

PURPOSE & BENEFITS

The Light Drive power assist is an electric motor that turns your manual wheelchair into an ultra-light, high-performance electric wheelchair in seconds!

An extended colour range, a new anti-tip, and a more ergonomic clutch system. The Light Drive power assist is changing in order to make life even more beautiful.

The motor attachment simply hooks onto the rear of your rigid or folding manual wheelchair.

The Light Drive unit is operated by a joystick while maintaining the chair’s manoeuvrability – it stops when you let go of the joystick and has a 360-degree movement including full reversal.

By releasing a clutch, you can free the wheel giving you the choice between using the power add-on assistance or manual use.

Safety is an important factor of the Light Drive with a downhill braking feature in place that automatically controls your descent.

Benoit Systemes have designed the Light Drive Wheelchair Power Assist to be a robust & reliable power add for most manual wheelchairs.

FEATURES

- Turns your self-propelled wheelchair into a power chair in seconds
- Climb hills with no effort, coast across the grass, and sweep along gravel paths and uneven pavers!

- Top speed 10km/h
- Range 14km-16km on one battery charge
- Funded by NDIS
- The unit is easy to unhook from the wheelchair making it an in-expensive power device to transport via a vehicle – no need for an expensive adaptive van for transportation.
- Provides wheelers with extra power while maintaining exercise, muscle tone, strength and energy.
- Avoids the need to switch to a heavy power chair.
- Can be fitted to kids' wheelchairs with a minimum width of 40 cm between wheels.
