

MOLIFT QUATTRO GANTRY FRAME

SKU: MQGF

PRODUCT DESCRIPTION

PURPOSE AND BENEFITS

A freestanding traverse gantry

Molift Quattro is a freestanding hoist unit that offers a (four post) Traverse System which is the best alternative when the hoisting need is temporary or when the facility is not build for fixed installations. The gantry is easy to install without the need to mount additional fixtures on wall or ceiling. It is ideally suited for temporary hoist applications in nursing or private homes.

Solves most overhead lifting situations

The traverse has a lightweight aluminum frame and four steel posts that provides excellent stability and covers the surface of the hoisting requirement. Molift Quattro solves all overhead lifting situations together with the Molift Air or Molift Nomad hoist motor and a sling. With a lifting capacity of max 300 kg, it is ideal for lifting and transferring a person from or to bed, floor, chair, wheelchair, toilet etc.

TWO OPTIONS

Molift Quattro can be delivered in two sizes: 3x3 meters and 4x4 meters. The length of the posts are fixed and the height is 2.46 m. Molift Air or Molift Nomad with trolleys are ordered separately.
