

OBI FEEDING DEVICE - OBI ROBOT

SKU: IFD-500-031

PRODUCT DESCRIPTION

THE FIRST DINING ROBOT OF ITS KIND

The Obi Feed Device provides its user;

- the freedom to eat at their own pace
- the option to choose the food they wish to eat
- a newfound sense of confidence, dignity and independence
- the ability to interact with others while dining

Works with most accessibility switches. One-touch Teach Mode. FDA and Underwriters Labs compliant. Lifelike food capture and re-positioning. Beautiful minimalist design. Travels easily to any type of outing.

“I’m a US Navy veteran with ALS and recently received my Obi. I can’t even begin to describe how happy I am! Before Obi, eating was a horrible struggle as my shoulders and hands were failing. My alternative was to interrupt the dining experience of my friends or family members so they could feed me. As a result of eating with Obi’s assistance, I’ve been able to maintain my weight and, of equal importance to me, I’m able to eat independently and enjoy dining with my family. Please know Obi is much more than a product you sell; Obi is a means to independence and restored joy while eating.”
Shelly H
