

OLITECH 4G SIM DESK PHONE

\$225.00

SKU: MOBILE PHONE

PRODUCT DESCRIPTION

Purpose & Benefits

The Olitech 4G Desk Phone is crafted specifically for ease of use, particularly catering to seniors. This device combines the familiar functionality of a traditional landline with modern cellular technology, allowing it to operate with a SIM card without needing a landline connection. It's designed to be simple to use with large buttons and a clear display, which makes it especially suitable for seniors or anyone who prefers a more straightforward device. The phone also offers loud, adjustable volume settings and an emergency button for quick access to help if needed.

Features

- **Large Buttons and Display:** Ensures ease of use for those with limited dexterity or vision.
- **SIM Card Operated:** Compatible with all 4G networks, it doesn't require a traditional landline connection.
- **Emergency Button:** Adds an extra layer of safety, allowing users to quickly call for help if necessary.
- **Speaker Phone and Speed Dial:** Enhances hands-free usage and allows quick dialling of frequently called numbers.
- **Backup Battery:** Provides reliability even during a power outage, ensuring the phone remains operational.
- **Wi-Fi Hotspot Capability:** Allows the phone to share its internet connection with other devices, which can be particularly useful for streaming on TVs or other smart devices.

Specifications

- Supports all major 3G and 4G networks in Australia. **Note 3G services are set to shut down by the end of September 2024*
- 11 x speed dial buttons

- No landline or NBN connection required
- Dimensions: 23cm x 18cm x 8cm
- Colour: Black

This phone is ideal for users who seek simplicity without sacrificing the conveniences of modern technology. It blends the physical traits of a traditional landline phone with the functional benefits of a mobile device, making it a valuable choice for seniors or those with accessibility needs.
