**SKU:** 1090604-H

## PRODUCT DESCRIPTION

### Purpose & Benefits

The **ResMed AirFit N30 Cradle Cushion** is intended for use with the AirFit N30 mask, offering a minimal-contact under-nose design. This reduces pressure on the nasal bridge and enhances comfort, especially for side sleepers or those sensitive to typical nasal masks. It helps users maintain therapy with less facial interference.

### Features

- Nasal cradle shape that sits below the nostrils instead of over them, reducing contact and pressure points
- Soft silicone design that flexes to facial contours while maintaining a secure seal
- Minimal facial contact, ideal for users wanting less mask intrusion

### Specifications

- **Available Sizes:** Large, Medium
