

## REDGUM STEP PLATFORM WITH HANDLE

**\$99.00**

**SKU:** B68SH

## PRODUCT DESCRIPTION

### Purpose & Benefits of Redgum Step Platform With Handle

The Redgum Step Platform With Handle is designed to provide additional height and stability for individuals who need assistance reaching higher areas safely, such as cabinets or shelves in homes or clinics. This platform is particularly useful for seniors, people with mobility limitations, or those recovering from surgery who require a stable support to maintain balance while stepping up to a higher level.

### Features

- **Sturdy Handle:** Equipped with a handle to offer extra support and stability, allowing users to maintain balance and prevent falls while using the platform.
- **Durable Construction:** Made from robust materials, the platform is built to support substantial weight and withstand frequent use.
- **Non-Slip Surface:** Features a textured, non-slip surface on the step to ensure a secure footing, reducing the risk of slips.
- **Wide Platform:** Provides a generous stepping area to accommodate users with different foot sizes and mobility needs.

- **Lightweight Design:** While sturdy, the platform is also lightweight enough to be easily moved and positioned as needed.

## Specifications

- **Dimensions:** Platform: 360mm (W); 285mm (D); 230mm (H);
- **Safe Working Load:** 136kg
- **Weight:** 4.3kg

The Redgum Step Platform With Handle is an essential tool for enhancing safety and accessibility in homes or clinical settings. Its robust design and practical features provide confidence and independence to users who need a little boost to reach higher areas safely.
