PRODUCT DESCRIPTION

Purpose & Benefits

The **ResMed Chin Restraint** is designed to gently support the jaw during sleep, helping to keep the mouth closed for improved CPAP therapy effectiveness and reduced air leaks. It provides added comfort and stability, particularly for users who breathe through their mouth at night.

Features

- Helps minimise mouth breathing during CPAP therapy
- Designed to gently support the jaw without excessive pressure
- Adjustable fit for comfort and stability

Specifications

- **Type:** Chin restraint strap
- **Colour:** Blue
