

BARIATRIC SELF HELP POLE 300KG

SKU: BSLH300

PRODUCT DESCRIPTION

PURPOSE & BENEFITS

The Bariatric Self Help Pole is a robust and innovative mobility aid designed to empower individuals with bariatric needs, facilitating safe and independent movements from a seated to a standing position. Engineered to support a maximum user weight (MUW) of up to 300 kilograms, this device is an essential tool for those seeking to enhance their mobility and for caregivers in both home and professional healthcare settings.

FEATURES

- **Bariatric Support:** Specifically crafted to meet the needs of bariatric users, this self-lift stand is built with a sturdy frame and strong lifting mechanism to safely support individuals weighing up to 300 kilograms.
- **Enhanced Safety:** The device includes multiple safety features, such as a secure grip handle and a stable base, to ensure a safe and reliable lifting process for users.
- **Ease of Use:** Designed with simplicity in mind, the self-lift stand allows users to independently manage their movement from sitting to standing positions, promoting autonomy and dignity.
- **Adjustable and Versatile:** Accommodates various body sizes and preferences with adjustable components, making it a versatile tool for a wide range of users.
- **Durable Construction:** Constructed from high-quality materials, the lift stand is designed for durability and long-term use, ensuring reliability and stability.
- **Mobility and Storage:** Though robust, the device is engineered to be as compact as possible, facilitating ease of movement within different spaces and storage when not in use.
