\$35.00 - \$46.00

SKU: A11061-H

PRODUCT DESCRIPTION

PURPOSE & BENEFITS

Introducing the Lumbar Roll Chiropractic Back Support Cushion, a simple yet effective solution that supports the lumbar curve and prevents slouching when seated. Whether at home or in the office, this portable and lightweight cushion provides chiropractic postural support, helping relieve back pain and promoting better posture.

The Spine Saver Lumbar Cushion is a versatile solution for lower back and neck pain, as well as poor posture. With its various shapes and foam densities, you can customize the support to suit your body frame and preferences, leading to improved posture and natural spinal alignment.

FEATURES

- Provides chiropractic postural support for the lower back or neck
- Helps relieve back pain
- Portable and lightweight, you can use it anywhere you sit
- Great for the car, at home or in the office
- Compact and convenient
- The elastic strap secures the roll in the desired position
- Five unique shapes - round, D, Demi D, egg or oval
- Available in memory foam or traditional foam options
- Available in Dura-fab faux-suede cover or Steri-Plus waterproof cover

VARIANT SHAPES

Let's explore the different shapes available:

1. Demi-D (Traditional Foam): The smallest lumbar roll, offering less pronounced lumbar support. Ideal for those new to using lumbar rolls or with smaller body frames.
2. Oval (Traditional Foam): Similar in size to the Demi-D shape but curved for slightly more pronounced support without rigidity. Suited for smaller to medium body frames.
3. D (Memory Foam): A full-size lumbar roll made of memory foam, providing a supportive yet less intrusive experience as it moulds to your back's shape. Suitable for medium body frames.
4. D (Traditional Foam): The most popular size, offering good support and noticeable postural benefits. A general go-to product suitable for medium and large body frames.
5. Round (Traditional Foam): Slightly more invasive than the D-shaped roll, best used on couches, armchairs, or padded chairs. Typically suited to larger body frames.
6. Egg (Traditional Foam): Offering very firm and rigid support, this lumbar roll is ideal for the largest body frames seeking a significant level of support.
