PRODUCT DESCRIPTION

Purpose & Benefits of the Steady Step® Perform

The Steady Step® Perform is an advanced ankle support brace designed to provide stability and protection for chronic ankle instability, acute ankle injuries, and as a preventative measure during high-impact activities like sports. This brace significantly aids in the rehabilitation process by providing compression, which helps reduce swelling and enhances blood circulation, and by stabilizing the ankle to prevent further injury.

Features

- **Dual Compression Straps:** Offers adjustable dual straps that create a figure-eight pattern, mimicking the wrapping of athletic tape. This feature provides superior ankle stabilization and adjusts to swelling changes.
- **Reinforced Side Stays:** Equipped with rigid stays on each side of the ankle for additional support, helping to prevent lateral and medial ankle twists without restricting overall movement.
- **Slim Fit Design:** Designed to fit comfortably inside shoes, allowing users to wear the brace during everyday activities, sports, and workouts.
- **Breathable Material:** Constructed from a lightweight, breathable fabric that keeps the foot cool and dry, reducing the risk of skin irritation during extended wear.
- **Easy Application:** The step-in and strap-up design makes it easy to put on and take off, providing a user-friendly experience, especially for those with limited mobility.
- **Versatile Use:** Suitable for recovery post-injury, as a preventative measure during physical activities, and for chronic instability support.

Specifications

- **Material:** Durable, breathable fabric enhanced with rigid side stays for additional stability.
- **Size:** Small, Medium, Large, Extra Large
- **Care Instructions:** Machine washable in cold water on a gentle cycle, air dry. It's recommended to close all straps to prevent damage during washing.

The Steady Step® Perform ankle brace is an excellent choice for individuals needing robust ankle support without sacrificing comfort or mobility. Whether used for daily wear post-injury, during sports for added protection, or for chronic ankle instability, this brace offers effective stabilization and pain relief, fostering a faster and safer recovery.
