PRODUCT DESCRIPTION

Purpose & Benefits of Steady Step® Toehold

The Steady Step® Toehold is specifically designed to provide support and stabilization for the foot and ankle while also addressing issues related to the toes, such as hammertoes, bunions, and other toe deformities. This unique support system combines the features of an ankle brace with a toe strap that helps realign and stabilize the toes, providing a comprehensive solution for foot discomfort and structural issues.

Features

- **Integrated Toe Strap:** Features an adjustable toe strap that can be positioned to support specific toes, aiding in the correction and alignment of toe deformities.
- **Ankle Support:** Offers robust ankle stabilization that helps to maintain proper foot alignment, reducing strain on muscles and joints throughout the foot.
- **Versatile Design:** Suitable for addressing a range of foot issues, including but not limited to hammertoes, bunions, and plantar fasciitis.
- **Breathable Material:** Constructed from a lightweight, breathable fabric that ensures comfort during extended wear, making it ideal for daily use.
- **Adjustable Fit:** Equipped with Velcro straps that allow for a customized fit, ensuring that the brace stays securely in place during various activities.
- **Ease of Use:** Designed for easy application and removal, making it convenient for users to manage their foot health independently.

Specifications

- **Material:** Durable, breathable fabric combined with sturdy straps for toe and ankle adjustment.

- **Size:** Small / Medium; Medium / Large;
- **Care Instructions:** Machine washable in cold water on a gentle cycle; recommended to air dry to preserve the integrity of the fabric and straps.

The Steady Step® Toehold is an excellent choice for individuals seeking a dual-function brace that offers both toe and ankle support. It's particularly beneficial for those needing corrective alignment for toe deformities while also requiring stability for the ankle and foot. This brace helps enhance mobility, alleviate pain, and improve overall foot health.
