PRODUCT DESCRIPTION

Purpose & Benefits

The **Diffuser Cushion** (Medium, 44 cm \times 42 cm) is expertly designed to relieve pressure on the spine and bottom, offering exceptional comfort for prolonged sitting—whether on dining chairs, desk chairs, or wheelchairs. Crafted with a premium memory foam surface over a heavy-density traditional foam core, it maintains support and resilience even under continued use. The cushion is lightweight and compact for ease of use in multiple settings. Choose between two cover options: the soft and washable Dura-Fab fabric for plush comfort and practicality, or the moisture- and bacteria-resistant Steri-Plus cover for hygienic, easy cleaning.

Features

- Dual-layer foam: memory foam over high-density traditional foam for pressure relief and structural support
- Compact and lightweight design—ideal for use across various seating environments
- Available with either a washable, plush-feel Dura-Fab fabric cover
- Or upgrade to a Steri-Plus polyurethane cover—moisture- and bacteria-resistant for hygiene and easy cleaning
- Medium size (44 cm × 42 cm) fits most standard chairs and wheelchairs

Specifications

• Brand: Therapeutic Pillow

• Size: Medium only (44 cm × 42 cm)
