

## TOPRO NEURO SAFETY BRAKE WALKER WITH BACKREST

SKU: 814746-H

## PRODUCT DESCRIPTION

### PURPOSE & BENEFITS

The Topro Neuro Safety Brake Walker is designed for people with Parkinson's disease or other neurological conditions. It features a reverse braking system that automatically locks movement unless the braking levers are compressed. This can help to prevent falling and ensure safety when sitting down and standing up.

The rollator also promotes good posture by encouraging users to walk inside the frame, rather than behind it. This can help to improve balance and reduce the risk of falls. Additionally, the rollator folds compactly and can be transported in cars, planes, trains, and buses.

### FEATURES

- The reverse braking system automatically locks movement unless the braking levers compressed
- Promotes good posture by walking inside the frame, not behind it
- Backrest included
- Available in Small & Medium
- Folds compact and can travel in cars, planes, trains & buses

### Why you need it

If you have Parkinson's disease or other neurological conditions, the Topro Neuro Safety Brake Walker can help you stay safe and mobile. The reverse braking system can help to prevent falls, the backrest can provide support, and the compact folding design makes it easy to transport.
