PRODUCT DESCRIPTION

Purpose & Benefits of Topro Walker Drag Brake Attachment

The Topro Walker Drag Brake Attachment is designed to enhance safety and control for users of Topro walkers by providing additional braking assistance on inclines or when navigating uneven terrain. This attachment offers several benefits to improve the overall stability and usability of the walker.

Features

- **Enhanced Safety:** Provides additional braking power to help users maintain control and stability, especially when navigating downhill slopes or uneven surfaces.
- **Adjustable Resistance:** Allows users to adjust the braking resistance to their preference, ensuring optimal control and comfort during use.
- **Easy Installation:** Attaches quickly and securely to the Topro walker frame without the need for additional tools or modifications, making it convenient for users and caregivers.
- **Intuitive Operation:** Features a user-friendly brake lever or handle that can be easily activated with minimal effort, even for users with limited hand strength or dexterity.
- **Removable Design:** Can be easily removed when not needed, allowing users to switch between different terrain or mobility needs without hassle.
