

PPU-S For Home and Care Centers

Consumer Model

The "People Picker Upper" standing model (PPU-S) safely lifts a fallen person from the floor, eliminating the need for a call to emergency services while transforming a stressful fall into a non-event.

It can raise individuals up to 300 lbs. (150 kg (EU)) to a seated or standing position, and allows for easy transfers to and from a wheelchair, bed, commode, exercise equipment or even the floor.

The standing lift function allows users to be safely raised to access a high bed or an overhead cabinet - a step stool without the step!

Can be self-operated or with the assistance of a caregiver.

Restores dignity and independence.

Assisted Operation

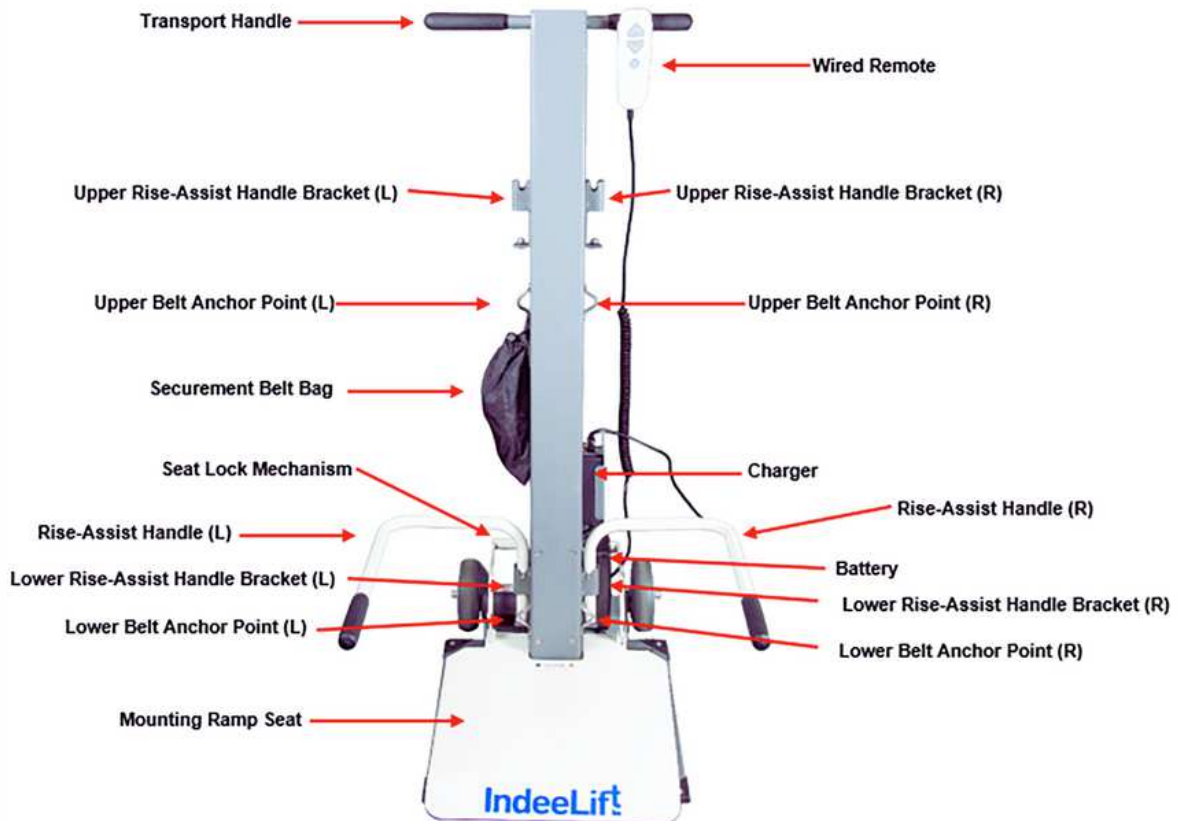

Self Operation

Summary of Features

- Beveled seat-front for easy slide on transfer surface
- Wired remote for convenient operation
- Swinging/Removable Rise-Assist Handles for easy secure transfer
- Dual safety belts for added safety
